FEW WORDS

Eventime is a responsive One and Multi page HTML Template, made not only for events and meetings, but it also can be adopted also for a lot of another business like theaters, clubs, creative agencies, corporate sites, etc.

Eventime is based on a unique liquid grid structure, which will be adopted for every mobile and desktop device.

All main styles you can find in css/custom.css and all colors' and backgrounds' settings in css/colors.css (color_1.css, color_2.css … etc – created colors from Demo).

Scripts of Eventime:
- Bootstrap 3+
- Jquery
- WOW animation
- CSS animate
- countUP.js
- Font Awsome Icons
- Google Fonts
- Wayponits library
- Other scripts and plugins

Photo credits:
Food images, used in the Eventime demo, are used by agreement right holder from:

- www.flickr.com - with commercial use allowed.
- www.photodune.net - with purchase of licences.

Images, used in the preview, are NOT included.

MAP Important!
Eventime Template uses Google API that could be replaced with your own. All Google Map settings you can find on bottom of page source. Maps will be displayed by script on div with map-canvas id.

Support:
I will respond to buyers' questions by email: chaykovskiythemes@gmail.com

CUSTOMISATION

Header:

Check <head> part of the html. You'll find all styles on the top. Color link can be changed into demo colors (color_1.css, color_2.css, color_3.css and color_4.css).

```
<!DOCTYPE html>
<html lang="en-us">
<head>
<meta charset="UTF-8">
<meta http-equiv="X-UA-Compatible" content="IE=edge">
<meta name="viewport" content="width=device-width, initial-scale=1">
<meta name="description" content="">
<meta name="author" content="">
<title>
Eventime </title>
<link rel='shortcut icon' type='image/x-icon' href='/favicon.ico'/>
<!-- Bootstrap Core CSS -->
<link href="css/bootstrap.min.css" rel="stylesheet">
<!-- Google Font Raleway -->
<link href='http://fonts.googleapis.com/css?family=Raleway:400,100,700,300' rel='stylesheet' type='text/css'>
<!-- Font Awesome Icons CSS -->
<link href="css/font-awesome.min.css" rel="stylesheet">
<!-- Custom CSS -->
<link href="css/custom.css" rel="stylesheet">
<!-- Colors and Backgrounds CSS -->
<link href="css/colors.css" rel="stylesheet">
</head>
```

If you want to use any other you just need to go to the color css file and replace the main color. Please use a global "Replace command" of your editor for replacing the color in all sections for one click.

On the bottom of color css file you'll find all image backgrounds' settings.

```
/*!----------------------- Main color of template #c37cff -----------------------*/
.navbar-nav>.active>a,
.navbar ul li a.active,
.navbar-nav>li>a:hover,
.arrow_right:hover,
.arrow_left:hover,
.photo_carousel figure figcaption,
.photo_carousel figure h2 span,
.contact_icon,
.footer .link:hover,
a.navbar-brand:hover,
.navbar_bg_dark .active a,
.texticon,
.count,
.count_plus,
.about_columns .fa,
.about_columns h4,
.contact a,
.copyright span{
    color: #c37cff;
}
```

On the head part you'll also find default tags like title, description, keywords, favicon. CSS stylesheets and Google Font link can be replaced with a new one. You need to go to custom.css and replace font name after replacing Google Font link.

Navigation:

Sticky header with navigation and non-sticky header are available. The difference between them is in "navbar-fixed-top" that can be deleted if you don't want the sticky navigation.

```html
<!-- Fixed navbar -->
<nav class="navbar navbar-fixed-top nav_mask">
<div class="navi_container">
  <div class="navbar-header">
    <button type="button" class="navbar-toggle collapsed" data-toggle="collapse" data-target="#navbar" aria-expanded="false" aria-controls="navbar">
    <span class="sr-only">
    Toggle navigation </span>
    <span class="icon-bar">
    </span>
    <span class="icon-bar">
    </span>
    <span class="icon-bar">
    </span>
    </button>
    <a class="navbar-brand" href="#home_slider">
    Eventime </a>
  </div>
  <div id="navbar" class="navbar-collapse collapse">
    <ul class="nav navbar-nav">
      <li>
      <a href="#about_menu">
      About </a>
      </li>
      <li>
      <a href="#schedule_menu">
      Schedule </a>
      </li>
      <li>
      <a href="#speakers_menu">
      Speakers </a>
      </li>
      <li>
      <a href="#reservation_menu">
      Reservation </a>
      </li>
      <li>
      <a href="#past_menu">
      Past </a>
      </li>
      <li>
      <a href="#contact_menu">
      Contact </a>
      </li>
    </ul>
  </div>
  <!--/.nav-collapse -->
</div>
```

Slider and Image home sections are very easy for editing, you just need change link inside the style of "fill" class. You will find content to change below.

```html
<div class="carousel-inner">
  <div class="item active ">
    <!-- Set the first background image using inline CSS below. -->
    <div class="fill" style="background-image:url('images/slider_1.jpg');">
    </div>
    <div class="fill_mask">
      <div class="description ">
        <h2 class="details wow fadeInDown">
        Design Days Conference </h2>
        <div class="details wow fadeInUp">
          <div class="fa fa-map-marker fa-2x">
          </div>
          <p>
            Main Conference Hall, New York, 180/2
          </p>
        </div>
        <div class="details wow fadeInUp">
          <div class="fa fa-clock-o fa-2x">
          </div>
          <p>
            20-24 AUG 2015
          </p>
        </div>
        <div class="buttons ">
          <a class="wow fadeInLeft btn eventime_button" href="#about_menu" role="button">
          Know more </a>
          <a class="wow fadeInRight btn eventime_button" href="#reservation_menu" role="button">
          REGISTRATION </a>
        </div>
      </div>
    </div>
  </div>
```

Template has the same structure begin for each section; firstly, it's the main section div with menu id, and the same title and descriptions classes.

```
<div id="about_menu">
<!-- Page Content -->
<div class="firstrow">
    <div class="centred">
        <div class="first_line wow fadeInDown">
        </div>
        <div class="first_title wow fadeInDown">
            <p>
                Design Days Conference
            </p>
        </div>
        <div class="first_description wow fadeInDown">
            <p>
                Organization of a Design Days Conference series is a result of the continued policy and continuous learning process, connecting researchers and practitioners
                attempting to understand better the problems they are trying to address. The objectives of the Design Days Conferences tend to be integrative across the various
                disciplines, to reach the current state-of-the-art, to cover the multidisciplinary aspects of design and to assure high level review policy.
            </p>
        </div>
    </div>
    <div class="wow fadeIn first_image">
    </div>
</div>
<div class="clear">
</div>
```

! Please don't forget to use "clear" and "gap" class for better crossbrowser results of page !

Schedule section contains carousel and accordion modules. Please, use section indicators for every next "day" for carousel. "Day" is the item class which contains accordion elements. Every ''day'' should have own accordion id, which you should have the same data toggle id inside and link for individual id div.

```
<div id="sh_carousel" class="carousel slide">
    <!-- Carousel indicators -->
    <div class="carousel-indicators">
        <div class="wow fadeInUp active btn eventime_button graybtn graytxt" data-target="#sh_carousel" data-slide-to="0">
            Opening day
        </div>
        <div class="wow fadeInDown btn eventime_button graybtn graytxt" data-target="#sh_carousel" data-slide-to="1">
            Second Day
        </div>
        <div class="wow fadeInUp btn eventime_button graybtn graytxt" data-target="#sh_carousel" data-slide-to="2">
            Third Day
        </div>
        <div class="wow fadeInDown btn eventime_button graybtn graytxt" data-target="#sh_carousel" data-slide-to="3">
            After Party
        </div>
    </div>
    <!-- Carousel items -->
    <div class="carousel-inner">
        <div class="active item">
            <!-- DAY ONE -->
            <div class="schedule_date wow fadeInLeft">
                21
            </div>
            <div class="schedule_month wow fadeInRight">
                August
            </div>
            <!-- Accordion item -->
            <div class="mini_gap">
            </div>
            <div id="accordion1">
                <div class="panel wow fadeInDown">
                    <a data-toggle="collapse" data-parent="#accordion1" href="#one_one">
                    <div class="accordion_left">
                        <div class="accordions_titles_small">
                            <p class="accordion_date">
                                9:00-9:30 a.m.
                            </p>
                        </div>
                    </div>
                    <div class="accordion_right">
                        <div class="accordions_titles_small">
                            <div class="accordion_description">
                                <p>
                                    Registration
```

Speakers use the same functional links as according, in meaning of link to individual div that attached to each href element inside the carousel.

Reservation form contains defined inputs from mail.php for every new text input you have to go to mail.php file and add needed name of input. Radio Labels (i.e. Prices) have the same name type, so it means that you can add any amount of this element without providing any php changes. Just don't forget to have individual Value of input.

Al settings of Reservation form you can find on mail.php file – such as email, text of alerts etc.

```html
<form id="reservation_form" action="#">
    <input class="wow fadeInDown" type="hidden" name="action" value="sendbooking">
    <input class="wow fadeInDown" name="first_name" type="text" id="make_a_reservation_input_1" placeholder="First Name">
    <input class="wow fadeInDown" name="last_name" type="text" id="make_a_reservation_input_2" placeholder="Last Name">
    <input class="wow fadeInDown" name="email" type="text" id="make_a_reservation_input_3" placeholder="Email">
    <input class="wow fadeInDown" name="address" type="text" id="make_a_reservation_input_4" placeholder="Address">
    <input class="wow fadeInDown" name="zip" type="text" id="make_a_reservation_input_5" placeholder="Zip Code">
    <input class="wow fadeInDown" name="telephone" type="text" id="make_a_reservation_input_6" placeholder="Phone">
    <input class="wow fadeInDown" name="price" type="radio" value="Type 1" id="radio01"/>
    <label class="wow fadeInUp" for="radio01">
    <span>
    $1350 </span>
    The Big Ticket gets you into all five days of HOW Design Live and includes all sessions, workshops, keynotes and networking events. </label>
    <input name="price" value="Type 2" type="radio" id="radio02"/>
    <label class="wow fadeInUp" for="radio02">
    <span>
    $800 </span>
    Two-Day Registration. Can't make the full four days of Design Days Conference, but have more time than just a day? Choose a two-day. </label>
    <input name="price" value="Type 3" type="radio" id="radio03"/>
    <label class="wow fadeInUp" for="radio03">
    <span>
    $350 </span>
    One-Day Registration. Choose to customize a time frame that works best for you. You'll still get to choose from every single session. </label>
    <input name="price" value="Type 4" type="radio" id="radio04"/>
    <label class="wow fadeInUp" for="radio04">
    <span>
    $5000 </span>
    Registering 5 or more from your company? The Group Big Ticket gets each member of your group into all four days of Design Days Conference. </label>
    <input type="submit" value="send request" class="reservation_button wow fadeInDown" role="button">
    <div class="clear">
    </div>
    <div id="contactMsg" class="wow fadeInUp">
    </div>
</form>
```

! Important !
* Contact form require web server to send email. Emails can go to your spam/junk folder.

* If you use custom email like yourname@yourcompany.com then may be your mail client can block php mail completely. I recommend using Gmail or other popular email address.

Animation:
It's easy to add animation for every element. Just add classes "wow" and effect i.e. "fadeIn". All names of Effects you can find on http://daneden. github.io/animate.css/
Icons = all names of icon classes you can find here: http://fortawesome. github.io/Font-Awesome/icons/ (we use version 4.4 (updated))
